

## Intelligent Lighting

### **Robe Robin 300 LED Wash**

This lightweight compact fixture is ideal for all small-to-medium applications, particularly those where space and accessibility is an issue. The 19 multi chip LED's ensure completely smooth colour mixing with an array of colours and hues.

### **Robe Robin 600 LED Wash**

The super-slim ROBIN® 600 LEDWash features 37 RGBW multichip LEDs with a very large colour palette. Arranged in 3 concentric rings these LEDs offer unique possibilities for creating stunning colours and patterns.

### **Martin Mac 500**

The MAC 500 is a reliable and award-winning profile spot luminaire, which projects a bright.

### **Robe Ponite**

Its a very bright and super -fast with parallel beams that cut through the air. It can project a static or rotating gobo. Combined with its 8 way prism and drop in frost it can create smooth even wash. Add to that the 13 rich colours it's the fixture that we all need to make our shows stand out.

**Robe Clubscan 150 CT**

Based on the successful ROBE DJ Scan 150XT, this fixture has master/slave and stand-alone operations. Easy to control, it is very versatile, with 13 unique gobos; a colour wheel with 11 colours, a UV effect filter and a shutter with a strobe effect.

**Robe Colorspot 250 AT**

Includes a new rotating gobo wheel with 7 replaceable glass gobos. Completely new software enables very smooth rotations of gobos and colours. The improved cooling system ensures better operating conditions for the lamp and reduces noise.
