

Generators

Bubbles Lighting has a complete range of generators to meet all your requirements.

Whether you are looking for a small generator to power a security cabin or an inflatable, or from a carnival stage to a complete festival we can provide either a standalone solution or a complete managed power generation service.

We can supply generators from 6KVA upwards, all fitted with voltage regulators suitable for running a whole range of lighting, sound, video and kitchen equipment. Generators can be run as a standalone or for those situations where a backup is required, we can offer generators that are linked together to keep your event running.

Contact us for further information and specifications about our generators.

Worried about running out of fuel, is your event more than a day?

We can offer fuel management including tanks and pipe work. We can organise additional fuel to be delivered direct to site.

Our staff are on hand to help you decide what equipment you require or we can design and install a complete onsite managed power solution for your event.

Contact us and we will get your event powered !!

Take a look at our Power Distribution section for more details on some of the distribution boards we have available to hire to power your event.
