

## Speakers

	<p><b><u>SX80's and SX300</u></b></p> <p>SX loudspeakers offer tour-proven performance and reliability. With high power-handling, great coverage, and smooth, consistent frequency response, cost-effective SX loudspeakers are the hard-working, easy-setup solution to your installation and portable system needs. Choose from 175w SX80's or 300w SX300's.</p>
	<p><b><u>KV2 EX12</u></b></p> <p>The EX12's 3" NVPD large format compression driver found in all KV2 flagship VHD range of products. This makes for one of the most perfectly balanced and accurate, compact, 2-way active boxes available on the market today. Complete onboard control courtesy of electronic crossovers, phase alignment, equalization and speaker protection are all integrated into the EX12's amplifier module.</p>
	<p><b><u>KV2 EX1.8</u></b></p> <p>The EX1.8 is a high output single 18" subwoofer housing a revolutionary VHD technology neodymium woofer. The EX1.8 features an impressive 1000 watts of power courtesy of KV2 Audio's switching amplifier technology and provides a very firm foundation on which to build a powerful EX system, or as a standalone subwoofer for any existing system.</p>
	<p><b><u>JBL Control Pro1</u></b></p> <p>Well balanced sound and exceptional power handling, ideal for recording studios, mobile audio video control rooms, broadcast studios, restaurants, discotheques, and audio-visual applications.</p> <p>These speakers are perfect for applications where tight corners and tough angles are all too common, combining high performance, compact design and rugged construction into a loudspeaker with unprecedented versatility.</p>
	<p><b><u>Yamaha MS101</u></b></p> <p>Ten watts of power with a single 10cm, full-range driver in a bass-reflex enclosure. Smooth response from 75 Hz up to 18,000 Hz. It features independent Low and High EQ controls so the sound can be accurately tailored to the listener's requirements and the acoustic environment. It features full magnetic shielding so they can be used in close proximity to video monitors or computer displays without affecting the picture.</p>
	<p><b><u>30w TOA 100V Line Horns</u></b></p> <p>Reflex horn speakers are designed for both indoor and outdoor paging applications as well as for background music reproduction. Also useful for onsite public address systems.</p> <p>The speaker boasts a wide range of wattage settings to suit your application.</p>

**BS-1030**

The BS-1030 is a small, 2-way bass- reflex speaker featuring a wide frequency range suitable for announcements and music. This IP rated speaker is capable at running at either low impedance ( $8\Omega$ ) or high impedance (100V) available in black or white.
