

## Stage Lighting Effects

### **Variable Speed Gobo Rotator**

Available to fit Source 4 profiles and takes a B Size Gobo. Unit speed and direction controlled from lighting desk over DMX.

Contact us for a full range of suitable gobo's

### **Chroma-Q Mirror**

The Mirror is a motorised mirror attachment which mounts onto fixed position profile fixture to achieve many of the effects traditionally only available with high priced intelligent moving lights. The moving mirror accurately redirects a fixed position beam of light through a pan of 230° and a tilt of 57°. As well as being compatible with most standard medium and narrow beam profile fixtures, the unit can be daisy chained with Chroma-Q colour changers and gobo rotators to provide moving colour and beam rotation effects.

### **Chroma-Q Colour Scroller**

The ChromaQ is a lightweight, highly reliable 16 frame colour scroller constructed using a modern composite shell. We stock scrollers to fit Par 64's, Source 4 Zoom and Starlette.

Scrolls supplied with stock roll – custom rolls available to order.

Control cables and power supplies available to connect up all your effects
