

Smoke Effects

Microfog Smoke Machine

The Microfog is an easy to use smoke machine that combines high quality components with the convenience of an aerosol unit. It is simply operated by one button at the rear of the machine which, when pressed, makes the machine generate clouds of thick, white, non-toxic fog, ideal for mobile use, schools, and the smaller venue.

G300 Smoke and Haze Machine

The G300 generates very large volumes of thick white smoke continuously. It combines a high powered smoke generator with a water based hazer. The operator can select either function, by simply changing the mode on the digital display and the type of fluid used. Includes a 7m remote cable.

Base Hazer Pro

With its variable output and variable fan speed, the machine can be used in many different applications of operation. Any desired effect can be achieved from the finest mist to a thick haze. The base-hazer-pro is able to fill small rooms to large arenas and theatres with a constant haze, creating the right atmosphere. The Haze Base Pro includes exceptionally low fluid consumption, 60 second heating time, very low noise, variable haze density through independent control of fan and pump; DMX control, integrated timer and stand alone mode.

DF50 Haze Machine

The safest, and most efficient hazer for the entertainment industry, superior hang-time - 3 hours plus! No warm up period required, Haze fluid is odourless and leaves no residue when used properly.

Antari Low Fog Ice Machine

As its name suggests, this machine produces beautiful floor-hugging dry ice fog effect by simply adding regular ice cubes. A high power fog machine inside creates amounts of smoke which is chilled to create a low lying ground hugging fog effect. 10kg of ice cubes placed in the ice chamber can last up to 12 hours or 80 minutes with continuous output. When used without ice, it will produce regular fog effect. Full DMX on-board means 100% control and the timer remote puts that the same control in the palm of your hand.

Jem AF-1 Fan

The AF-1 is a compact but powerful fan designed with clubs, studios, theatres and touring applications in mind. The AF-1 features DMX (unit has 3pin DMX input and pass-through) control as standard and can be installed from the ceiling, in the truss, or can be floor standing.

Windstorm Fan

The Windstorm is a high output wind machine for use in clubs, concert venues and on stages. The wind output can be adjusted from a light breeze to a strong gale at one percent increments via the on-board controls or via DMX from a lighting desk. The machine can be floor mounted or when supplied with brackets can be truss mounted.

We carry stocks of smoke and haze fluid for not only our rental machines but also many commonly found machines in theatres and venues. Please feel free to contact us with your effect fluid stock requirements.
